

A blue hospital gurney is shown in a hallway, tilted upwards. The gurney has a blue plastic shell and a beige metal frame. It is on four large, black and white wheels. The background shows a white wall with a window and a door. The text "Just what hospitals need..." is overlaid on the image in a dark, sans-serif font.

Just what
hospitals need...

Infection control in a can

Introducing

easy-onTM
PROTECTIVE COATING

The revolutionary solution that can give your
walls up to 20 years protection.

Infection control in a can!

easy-on is an incredibly tough and durable infection control coating. Just one coat of this safe and easy-to-use paint dramatically improves a drab-looking ward and will protect it against the spread of infection for the next 20 years.

Independent testing has shown that when painted walls are wiped, bacteria is left behind to breed, but when walls have been protected with **easy-on**, 100% of bacteria is removed without damage.

The quartz-like structure of **easy-on** withstands daily scrubbing for up to 20 years without staining or discolouration, so even the toughest of hospital cleaning regimes won't compromise its newly painted good looks.

Bacteria, germs, stains, scuff marks and even graffiti can all be eradicated without needing to re-apply the coating. This means that regular redecoration, and the disruption it causes, could become a thing of the past.

Every hospital corridor, ward, theatre and wall can be upgraded ; so if you're considering any redecoration make sure your top coat is the hygienic tough coat - **easy-on**.

The benefits are clear

- P** Resists bacteria, germs, scuffing, blood, graffiti, uric acid, etc,
- P** Simply brush, roller or spray apply to protect any surface
- P** Permanent non-stick finish makes cleaning easy
- P** Dries to form a seamless and hygienic wipe clean barrier
- P** Incredible long life, up to 20 years protection
- P** Less redecoration = less disruption
- P** Withstands 100s of cleaning operations
- P** Highly abrasion resistant – absorbs damage and impacts
- P** Quick drying - single coat application
- P** Low odour and solvent free

- P** Withstands knocks and bangs from trolleys and equipment
- P** Suitable for corridors, stairwells, wards, theatres, clean rooms, etc
- P** Resists everything hospital life can throw at it
- P** Independently tested

What our customers say

Good looks - day in, day out easy-on brings together and protects all areas of the hospital. It enables the same high standard of cleaning and disinfection to take place in every ward, theatre, corridor and stairwell. A coat of this tough, non-stick, hygiene coating, instantly upgrades walls, doors and ceilings. Even daily scrubbing doesn't compromise its appearance so hospitals look glorious day in day out.

The 'super bug' destroyer

Testing has proven easy-on to be one of the most important breakthroughs in hospital infection control. easy-on will prevent the colonisation and growth of major pathogenic bacterial species whilst enabling daily cleaning to take place without discoloration to walls ceilings or doors. easy-on is not only the greatest advance in the fight against "Super bugs" we've seen but it will also save the Health Service millions of \$\$\$\$s in redecoration costs every year. Truly a "world beating" product.

Less ward closures

The benefits to using easy-on are many. Obviously wards protected with this infection control coating are much cleaner and the risk of HAI's is therefore greatly reduced. One key benefit is that because easy-on protected wards only need redecorating every 20 years there are far less ward closures. Good news for anyone on a waiting list.

Application is easy too

Brush...

Roller...

Spray...

Applied by brush, roller or spray in a single coat, easy-on will form a seamless yet breathable topcoat over any existing paint finish or bare substrate.

Surfaces

Painted or unpainted bricks, concrete, tiles, metals, stone, plaster, timber, walls, doors and ceilings.

easy-on™
PROTECTIVE COATING

The protective wall coating with the hard-wearing, long-lasting finish
